

The best for your wood.

KORA[®]-wood preservation: the program that professionals trust.

KORA[®] stands for **Kurt Obermeier Raumland** and for more than 50 years of experience in wood preservation. Since 1948, we supply trade and industry with professional wood preservatives. Additionally, since 1988, we are using the know-how acquired through decades of experience to develop and produce our own products.

There are many good reasons why professional customers choose KORA[®] products; such as the high quality, the comprehensive range of products and the extensive and competent consulting services from our wood preservation experts. We offer our customers personal support so you can be assured to always choose the right product and therefore to optimally protect your wood.

The cover picture shows the wood roof construction of the **elephant house in the Cologne Zoo**. Here as well, KORA[®] products provide protection and longevity.

FRAUENKIRCHE (CHURCH OF OUR LADY) DRESDEN

The cupola of the reconstructed **Frauenkirche in Dresden** has an interior wood construction that is preventively impregnated with KORA[®] wood preservation products.

BAD BERLEBURG CASTLE

The interior construction of the restored **"Red Tower"** in the castle of Bad Berleburg is protected against fungal decay and insect attack using KORA[®] products.

TRADITIONAL HANDCRAFT

and modern wood construction require professional wood protection – a requirement that we are glad to fulfill.

Laboratories/Product development

KORA[®]-wood preservation includes:

Always a step ahead – our research.

Strict controls, quality management according to DIN EN ISO 9001:2000 and close cooperation between research and production are the foundation of the high quality of our products. Practice-oriented research in our state-of-the-art laboratories are at the beginning of every new development.

Safe and clean – our production.

Our modern production system guarantees consistent high quality while at the same time protecting employees and the environment. For example, the cleaning of exhaust air and the abidance of strictest safety requirements for the storage of products is self-evident. We also demand maximum environmental compatibility.

Consulting services plus experience – a service plus for you.

We attach a great importance to extensive consulting services in order to protect your wood in the best possible way. We will support you in selecting and using the best product and provide a customized solution based on customer-specific tests. You will benefit from the broad spectrum of our KORA[®] products. The quality and variety of these products will fulfill all of your requirements –for trade as well as for industry. Based on many years of experience gained by operating two vessels

Palisades impregnated with Korasit[®]CKF

Surface Finishing

for vacuum pressure impregnation, we also have the necessary know-how in the area of large scale commercial impregnation.

An additional plus:

We offer prompt delivery from our warehouses in Raumland and Duisburg using our own works transport or shipping companies – customer-oriented, reliable and flexible.

We have the suitable product for every application area.
